

Performance Liquid Chalk, 60 ml

#### **DESIGNED FOR**

Enhanced grip while lifting

#### **SCIENTIFICALLY ENGINEERED**

Contains sports grade Upsalite engineered for enhanced grip

#### **LONG-LASTING GRIP**

Lasts longer before needing re-application

#### **USER FRIENDLY AND SAFE**

Quick-dry, easy application that dusts less and leaves no sticky residue

#### **DOUBLE MOISTURE ABSORPTION**

Absorbs twice the moisture compared to regular liquid chalk

## **THE SCIENCE OF BETTER GRIP**

### **DOUBLE MOISTURE ABSORPTION TO ENHANCE PERFORMANCE**

A scientifically engineered grip, the Eleiko Performance Liquid Chalk contains sports grade Upsalite®, a mesoporous magnesium carbonate engineered to provide superior grip. With its large surface area and high pore volume, Upsalite absorbs 10 times more moisture than regular magnesium carbonate increasing friction and grip on the bar. The alcohol base evaporates quickly leaving an even coverage with less mess and residue on equipment – a cleaner, longer-lasting grip.
