

UNMATCHED PERFORMANCE

SMOOTH EVEN ROTATION IN A GRIP YOU CAN GET YOUR HANDS AROUND

The Evo Dumbbells embody our commitment to quality, craftsmanship and durable design. The award-winning rotating Evo dumbbells were designed specifically for professional and commercial settings to deliver unrivalled performance in high volume, heavy use environments. Inspired by our roots in lifting, we use Eleiko barbell steel and our knurling techniques for an optimal grip and introduce an innovative handle design that delivers an incredibly smooth rotation with a smaller diameter grip. Attention to detail extends to the dumbbell heads where a multisided head design, sloped head shape, and embossed weight markings combined with our unique handle deliver outstanding performance that will appeal to lifters and facility owners alike. While offered as a full range from 2.5 - 150 lbs / 1-60 kg, the rotating functionality begins at 12.5 lbs / 5 kg respectively. While fixed, the smaller weights feature the same knurling feel and visual design creating a uniform set.
