

**DESIGNED FOR**

Creating XF Rigs and functional fitness training rig solutions

**QUALITY CONSTRUCTION**

Strong sturdy steel tubing and durable powder coat finish

**CUSTOMISED CREATIONS**

Use the rig pieces, components and attachments to create rig solutions to meet all your facility needs

## FINISHING TOUCHES

### COVER PLATE FOR RIG UPRIGHTS

The XF 80 Installation Cover Plate fits around an XF 80 Rig upright and is used when a rig is being installed into rubber flooring. The plate covers the hole in the rubber flooring created when anchoring the rig for added safety and improved aesthetics. Sold separately, each leg requires a plate and includes four small 5 mm holes for fastening the plate to the rubber (screws not included).
