ADJUSTABLE ADVANTAGE

CLEAN LINES, SMART DETAILS AND DURABLE CONSTRUCTION

Eleiko's Olympic Decline Bench is designed for presses in a decline position and building upper body strength. The bench features ten height adjustments for the bar hooks so users can find a comfortable starting and ending position. Adjustment positions are numbered on both side of the uprights so lifters can easily confirm their position. The hooks feature built-in polyurethane rollers to protect the bar knurling and allow lifters to adjust the bar while loaded for optimal positioning. Integrated weight storage pins keep weights close at hand and the lifting area clutter free. If extra stability is needed, the bench can be bolted to the ground using the hidden bolt holes in the frame. The Olympic Decline Bench is equipped with rubber end caps and feet to protect floors and keep the bench firmly in place.
